Forecast for Sunday 26 Jun 2022

Weather: A rather cloudy day with the best of any brightness to be found in the east of the Park this morning. Scattered showers will be replaced with longer periods of rain, persisting in places for much of daylight hours. Rain will often be heavy, especially across western facing slopes, resulting in localised flooding of paths. There is also a low risk of an isolated shower being thundery. Strong southwesterly winds will gust to gale strength across slopes above 700m, with a risk of isolated gusts to gale force where funnelling occurs at lower levels.

Chance of cloud-free hill tops above 800m: 60% for most of the day, dropping to 30% in prolonged heavy rainfall and also across western facing slopes later this evening.

Low Cloud and visibility: Extensive cloud predominantly around 800-900m but occasionally lowering to 400-500m, increasingly so later this evening, shrouding higher routes. Visibility also frequently dropping to poor at all levels as a result of the showers and heavy rain, but good in the east at first where drier.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds will be strong all day, with gusts in excess of 50mph above around 700m giving very difficult walking conditions, with progress highly impeded and a significant risk of being blown over. Be sure to wear appropriate footwear with good grip in addition to windproof and waterproof layers.

Forecast for Monday 27 Jun 2022

Weather: Cloudy and wet start with showers, potentially heavy, merging to form longer spells of rain. These showers gradually easing and clearing to the east to give a largely dry afternoon with sunny spells. Some showers still possible in the afternoon. Remaining fine and dry into the evening, but with some higher-based cloud spilling eastward.

Maximum wind: Westerly 15-20mph, becoming southwesterly 20-25mph, gusting 30-35mph on summits after midday.

Chance of cloud-free hill tops above 800m: 20% to begin, increasing to above 90% by late-morning as rain clears.

Low Cloud and visibility: Cloud banks covering slopes above 400m through the first half of the morning, with poor visibility in the showers or longer spells of rain. Cloud bases lifting clear of the summits by late-morning. Visibility improving to very good, with distant hills clearly visible.

Temperature: **Valleys:** Plus 10 Celsius, rising to plus 16 Celsius.
At 800m: Plus 4 Celsius, rising to plus 6 Celsius.
Freezing level: Above the summits.
